The **IDEAL SCOPE MOUNT SYSTEM** series of mounts feature **seven set of interfaces** to attach any of more than 40 different **accessories** and has a bubble level integrated in the rear plane of the mount body to prevent canting of the rifle. The rings are diagonally cut for increased visibility of the elevation and windage turrets (US Patent 8,733,011).

The mounts are machined from billet 7000 series aluminum and all aluminum parts are hardcoat anodized. The Torx 20 ring and clamping screws are zinc-nickel coated for corrosion resistance and come pre-waxed from the factory to ensure proper torque values.

The mount is shipped with an adjustable recoil screw, a manual, and a "wedge" leveling key.

NOTE:

The SS-3601 is designed for use with 56 mm objectives on Sauer STR dovetails instead of MIL-STD-1913 or STANAG 4694 rails. The SS-3601 will fit most 30 mm scope tubes except for scopes with extended erector housings, such as the US Optics TPAL/EREK.
